

Advanced Content Curriculum (ACC) students have options for blending their schedules with honors-level, Advanced Placement, and electives offered at both Thomasville High School and Scholars Academy campuses. Similar to AIMS at the middle school level, ACC allows students to maximize their instruction in

areas of strength and talent while still being successful in academic areas in which they may need additional support. A minimum of 2 courses, up to 5 courses may be shared between the two campuses. Students who graduate having taken ACC offerings will receive a designation upon graduation for maintaining a blended advanced honors, and AP course workload.
